

# Your Visit System

## Doorbell Transmitter - Description

The Visit door transmitter is part of the Visit smart home system that helps you to keep tabs on your home. It tells you when guests are at the door, so you can keep track of the comings and goings in your home. The door transmitter recognizes the majority of doorbells and intercoms by default and can be programmed to identify virtually any doorbell sound.

## FEATURES

- Reliable transmission** Up to 250 m operating range
- Flexible** Detects all types of doorbells & intercoms
- Secure detection** Uses digital sound fingerprint technology
- Programmable** Can be programmed to recognize any sound
- Long lasting power** Last 5-10 years depending on battery type

## Buttons and connections
